

JAGUAR

JAGUAR..... Fast and Wild

This new , limited production, bass cat leavels nothing on the "I need" list.

At 21,5 this new cat **JAGUAR** is monster with ratings for up to a 350 engine.

It is pretty nimble as it jumps out of the hole in a handfull of seconds, and reaches a GPS top edd from high 60's to mid 70's. Speed, of course, will depend on factors such az load,power and water conditions.

In the mid 2000 era bas Cat sidelined the **Jaguar** name until a boat was built tht was worthy of that iconic heritage started in 96.

This new **Jaguar** has achieved yhat goal!

JAGUAR HARDWARE AND SPECIFICATIONS

Jaguar Specifications:

Length	21'5"
Min. Storage Length	26'5"
With Swing Away Tongue.....	23'9"
Beam	94+"
Approx.Wt.	2150lb.
Fuel Capacity	53 Gal.
Max.H.P.Rang	250-350

This rig is designed to address a luxury bass boat market in style. It is a massive rig with a huge deck expanse including 6 casting deck. Overall there are eight storage areas between the bow and console, which includes two of the most innovative tackle organizing systems to date!

JAGUAR DECK

The front deck includes those two tackle organizing storages, dual rod lockers, net scabbard, two additional storages, a helmet box for two helmets in the deck step, and a 34 quart cooler with sandwich tray.

SEATING

Seating is cockpit style in deep body and includes a cubby to the fire extinguisher and a throw pocket under the drivers and passengers bucket style seats. There is also a pivoting center seat for a third passenger.

Anglers will find three rod storage compartments, which includes an added left hand 8" passenger rod storage box located in the rear deck. This offers a 6 rear casting deck width, you will also find a passenger storage compartment, spare prop and oil storage and very unique spare trolling motor compartment behind the seats, which also serves for life vest storage. Options on most other top of the line rigs will probably be found as "standards" on this **Jaguar**. Standards such as a security systems, lighted storage areas, dual rear view mirrors on console, sony stereo, fully deployable telescoping hinges boarding ladder, built in LED recessed bow light, telescoping LED stern anchor light and a four bank charger all standards. As for the bass cat Jaguar trailer, a Grab Post and step at the tongue, dual axle brakes on a tandem axle trailer all standards.

Everything is over the top on the **Jaguar**, as found on most luxury vehicles. If you think you're a good fit, as the angler who wants only the very best.

JAGUAR STANDARD HARDWARE AND EQUIPMENT
